

Special Issue

Environmental Tobacco Smoke Exposures in Pediatric Populations

Message from the Guest Editors

The objective of this Special Issue of the International Journal of Environmental Research and Public Health (IJERPH) is to provide a means to enhance the global discourse on novel interventions that address pediatric tobacco smoke exposures targeting clinical outcomes (e.g., asthma) or future uptake of smoking behaviors by adolescents. We are looking for new ideas or interventions that have been conceived and/or tested in a variety of socioeconomic, geographic, or healthcare contexts. Non-traditional strategies derived from disciplines outside of the medical and public health arenas are particularly encouraged (e.g., arts, engineering, economics, education, anthropology, geography, social work, etc.). Manuscripts that have a community-centric focus will be prioritized, and we are very interested in articles published with the input or authorship of non-academic stakeholders (e.g., non-profit organizations and local communities). We are open to a variety of research presentation formats, including original research articles, literature reviews, methodological papers, position papers, brief reports, and commentaries.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
