

## Special Issue

# Evaluation and Health Impact of Toxic Metals Pollution

### Message from the Guest Editor

We are pleased to announce the Special Issue entitled "Evaluation and Health Impact of Toxic Metals Pollution". This Special Issue focuses on the current state of knowledge which links the evaluation of toxic metal pollutions and their impact on the environment, including human health. New research articles, reviews, and case studies are welcome to this Issue. We invite contributions from different disciplines, including environment survey, risk management, health impact assessment, environmental remediation, and environmental strategy. The following topics are examples which could be addressed in this Special Issue:

- Reports of environment surveys to address toxic metal pollution in the soil/water/air environment of a stated area or country.
- Research on new approaches to evaluate/monitor toxic metals.
- Research on the ecological response to toxic metal pollutions, including microbes, animals, and plants.
- Research on the assessment of the risks posed by toxic metals to human health or ecological systems;
- Research on new approaches to purify/remediate toxic metal pollution from contaminated environments.

### Guest Editor

Dr. Mei-Fang Chien

Graduate School of Environmental Studies, Department of Environmental Studies for Advanced Society, Tohoku University, Sendai, Japan

### Deadline for manuscript submissions

closed (31 January 2022)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
