

Special Issue

Occupational/Residential Exposure to Toxic Xenobiotics

Message from the Guest Editors

This Special Issue of the International Journal of Environmental Research and Public Health (IJERPH) focuses on the current state of knowledge regarding the links between exposure to toxic/genotoxic/carcinogenic xenobiotics and human health. Original research papers (in vitro, in vivo, and human studies), reviews, meta-analyses, are welcome in this issue. Other manuscript types accepted include methodological papers, position papers, brief reports, and commentaries. We will accept manuscripts from different disciplines, including exposure assessment science, epidemiology, intervention studies, risk and health impact assessment, risk management. Papers dealing with new biotoxicological approaches aimed at identifying early effects and individual susceptibility through “omics”, including epigenetics, and at measuring and characterizing biological effects from gene–environment interactions will be particularly appreciated.

Guest Editors

Dr. Massimo Moretti
Dr. Milena Villarini
Dr. Mattia Acito

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
