

Special Issue

Tuberculosis Program Implementation

Message from the Guest Editor

A Special Issue entitled “Addressing gaps in tuberculosis program implementation” in the International Journal of Environmental Research and Public Health is being planned. For detailed information on the journal, please use the following link <https://www.mdpi.com/journal/ijerph>. According to the World Health Organization, prior to the COVID-19 pandemic, many countries were experiencing a reduction in tuberculosis incidence and mortality. However, the latest global tuberculosis report shows that there was still a large gap in TB notifications, bacteriologically confirmed cases, detection and treatment of MDR/RR-TB. A substantial scale-up of TB preventive services is needed to reduce the risk of TB infection progressing to active disease. Although funding has doubled since 2006, it has fallen far short of what is needed. Program managers, public health specialists and researchers in the tuberculosis field have been looking at innovative tools or interventions to address the different programmatic gaps and to mitigate the negative impact of COVID-19. The keywords listed below provide an outline of some of the possible areas of interest.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens
University Australia, Adelaide 5000, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
