

Special Issue

Environmental and Health Effects Associated with Wastewater Pollution, Treatment and Reuse

Message from the Guest Editor

This Special Issue will include studies on the modernization of traditional technologies and/or the development of new different (bio)-remediation technologies for a more efficient removal of traditional contaminants (i.e., COD, BOD, nitrogen, phosphorous, heavy metals, nutrients, and pathogens) in water and wastewater in order to meet the regulatory requirements for water quality. Manuscripts, position papers, and reviews addressing these topics are all welcome in this Special Issue.

Guest Editor

Dr. Alessandra Cincinelli

Department of Chemistry, Università degli Studi di Firenze, 50121 Florence, Italy

Deadline for manuscript submissions

closed (31 December 2021)

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
