

Special Issue

What Is Wellbeing?

Message from the Guest Editors

We see conceptualising and clearly defining wellbeing is an essential first step in the successful development of any wellbeing theory, policy, or intervention, and at the base of any scientific attempt to measure or improve wellbeing. As such, a comprehensive and socially relevant research approach needs to be established to better understand what wellbeing is and what it means to people. Therefore, we cordially invite papers for this Special Issue addressing these issues and topics, especially those combining a high academic standard coupled with a practical focus on wellbeing. New research papers, reviews, and case reports are welcome to this issue. Papers dealing with new approaches to understanding wellbeing are also welcome. Other manuscript types accepted include methodological papers, position papers, brief reports, and commentaries. As an interdisciplinary effort, we will accept manuscripts from different disciplines across the sciences.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
