

Special Issue

New Concepts in Women's Bone Health

Message from the Guest Editor

We are organizing a Special Issue on “New Concepts in Women's Bone Health” in the International Journal of Environmental Research and Public Health. The venue is a peer-reviewed scientific journal that publishes articles and communications in the interdisciplinary area of environmental health sciences and public health. For detailed information on the journal we refer you to http://www.mdpi.com/journal/ijerph/special_issues/women-bone-health. This Special Issue is open to any subject area related to the physiology of bone health across woman's lifecycle, to social/emotional/environmental challenges that are unique to women and to therapies that ensure resorption/formation bone balance to prevent fragility fractures. Our goal is to gather and present the newest data about women's bone health and fracture prevention, to revise outmoded concepts, and ultimately to improve public health for women of all ages.

Guest Editor

Professor Jerilynn C. Prior

Division of Endocrinology, Department of Medicine, The University of British Columbia, Vancouver, Canada

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
