

Special Issue

Women's Health, Pregnancy and Child Health

Message from the Guest Editors

Worldwide maternal and child-health-related outcomes are markedly affected by environmental and socio-demographic factors including access to healthcare, vaccination, good nutrition, adequate housing, clean water and sanitation, education and employment. Following the success of the previous Special Issue “[Pregnancy and Child Health](#)”, this Special Issue aims to further advance scientific and professional knowledge in the field of maternal and child health. We have a particular interest in studies related to equity, diversity and inclusion and sustainable interventions addressing health inequalities among women, mothers and children. [This Special Issue](#) will accept manuscripts addressing maternal and child health practice, policy and research, exploring a wide range of topics and disciplines, such as epidemiology, public health, nutrition, nursing, social sciences, demography, health status assessment, innovative service initiatives, service evaluation, economic evaluation, policy analysis, advocacy and professional development.

Guest Editors

Prof. Dr. Amanda Rodrigues Amorim Adegboye

Dr. Kim Bul

Dr. Dayana Rodrigues Farias

Dr. Maria Beatriz Trindade De Castro

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
