Special Issue

Work Stress and the Development of Chronic Diseases

Message from the Guest Editors

We are organizing a Special Issue on the impact of work stress on the development of chronic diseases in the International Journal of Environmental Research and Public Health. In times of ageing populations, people work and live longer, but, while aging, they also suffer more often from chronic diseases. Analyzing the impact of work stress on the development of chronic diseases is, therefore, a topic of high relevance to science, as well as to policy. With this Special Issue, we invite you to submit high-quality original research articles or reviews that provide solid new findings extending the current state of knowledge. Preference will be given to contributions using longitudinal data and or experimental/intervention designs. Studies with crosssectional design will only be considered as exceptions if convincingly justified.

Guest Editors

Prof. Dr. Johannes Siegrist

Senior Professorship on Work Stress Research, Life Science Centre, University of Düsseldorf, Merowingerplatz 1a, Düsseldorf 40225, Germany

Prof. Dr. Jian Li

1. Institute of Occupational, Social and Environmental Medicine, Centre for Health and Society, Faculty of Medicine, University of Düsseldorf, Universitätsstrasse 1, 40225 Düsseldorf, Germany 2. Department of Environmental Health Sciences, Fielding School of Public Health, School of Nursing, University of California Los Angeles, 650 Charles E. Young Drive South, Los Angeles, CA 90095, USA

Deadline for manuscript submissions

closed (30 November 2017)

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
