

## Special Issue

# Social Media and Health: Emerging Trends and Future Directions for Research on Adolescents and Young Adults

### Message from the Guest Editors

The ubiquity and affordances of social media have allowed adolescents and young people to become both active posters and passive recipients of communication related to health. For instance, people may post exercise goals and behaviors on social media, while at the same time, they may be exposed to friends drinking alcohol and/or indulging in unhealthy snacking. This intersection of sociotechnical systems (i.e., social media) and health and wellbeing has garnered increasing scholarly attention. However, much is still unknown as to why some, but not other, people actively post about health topics; the effects of exposure to health-related content on social media; and how (for instance) social network structures influence individual and community health. For this Special Issue, which focuses on adolescents and young adults, we invite conceptual papers and original research using multiple methodological approaches to address these topics.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
