# Youth Violence as a Public Health Issue

# Message from the Guest Editor

According to the WHO, youth violence has been recognized as a serious public health problem in almost all countries around the world. A number of human service professionals and policymakers have been working hard to stop violence and to identify most effective method of preventing youth violence. This Special Issue welcomes submissions that examine the role of personal, social and environmental influences in the etiology and prevention of youth violence. It also investigates the best practices of youth violence prevention. Special emphasis will be placed on the integration of theories, research and/or practice in illustrating how and what can be done to stop youth violence from a public health perspective. Contributors from public health, criminology, criminal justice, psychology, psychiatry, sociology, public health, social work, and allied fields are encouraged to submit a full paper for publication. It is hope that this Issue will advance our understanding of youth violence and help identifying effective strategies to stop violence from a public health perspective.

# **About the Journal**

# Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

# Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens University Australia, Adelaide 5000, Australia

### **Author Benefits**

# **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.
