

Special Issue

New Quality Productive Forces: The Role of Green Finance and Artificial Intelligence in Finance

Message from the Guest Editor

The International Journal of Financial Studies is pleased to announce a call for papers for a Special Issue on new quality productive forces. Characterized by innovation, new quality productive forces are essentially advanced productivity. These forces represent a departure from traditional economic growth models and are in line with China's new development philosophy, prioritizing sustainability and innovation, with green financial tools and artificial intelligence (AI) applications in finance playing important roles, respectively. The functional methodologies include environmentally friendly, high-tech, efficient, and high-quality productivity methods. The welcome original articles, reviews, case studies, and conceptual papers that provide novel insights into the green finance- and artificial intelligence-related aspects of new quality productive forces.

About the Journal

Message from the Editor-in-Chief

I'm thrilled to take the leadership reins of the *International Journal of Financial Studies* and welcome the opportunity to make it one of the vanguard open-source scientific journals in our field. I eagerly look forward to working with the journal editorial team in building upon the quality instilled by my predecessor to develop the title further and broaden the appeal to other new finance research areas while keeping our core a high-quality finance journal that serves and highly values the scientific community, readers and authors alike. *IJFS* aims to publish high-quality manuscripts in both theoretical and empirical finance spanning all the major research areas in the field. It aims to provide an outlet for original finance scholarly research that promotes interaction among finance scholars and practitioners and bridges the divide that can exist between them.

Editor-in-Chief
