

## Special Issue

# Global Perspectives of Business Environment

### Message from the Guest Editors

The business environment reflects the existing economic objectives and preconditions for the economic activities of business subjects. A quality business environment is the basic prerequisite for the sustainable development of enterprises and the growth of competitiveness, and the quality of the business environment is a measure of the achieved economic results. Monitoring the quality of the business environment points to the fact that the most important areas for determining business purposes and decisions in practice are not only corporate and capital management and financial policy but also macro-economic factors. However, the latest developments have been affected by the coronavirus pandemic, which will change the future perspectives of enterprises worldwide. Knowing how to reduce the accompanying risks can stabilise financial markets and economies. This Special Issue is particularly interested in papers focusing on (1) the global perspectives and trends of financial markets; (2) corporate finance and the systematic risks of enterprises; and (3) the impact of COVID-19 on the business environment and financial markets.

## About the Journal

### Message from the Editor-in-Chief

I'm thrilled to take the leadership reins of the *International Journal of Financial Studies* and welcome the opportunity to make it one of the vanguard open-source scientific journals in our field. I eagerly look forward to working with the journal editorial team in building upon the quality instilled by my predecessor to develop the title further and broaden the appeal to other new finance research areas while keeping our core a high-quality finance journal that serves and highly values the scientific community, readers and authors alike. *IJFS* aims to publish high-quality manuscripts in both theoretical and empirical finance spanning all the major research areas in the field. It aims to provide an outlet for original finance scholarly research that promotes interaction among finance scholars and practitioners and bridges the divide that can exist between them.
