

Special Issue

Advances in Behavioral Finance

Message from the Guest Editor

In recent years, since the seminal papers of Antweiler and Frank (2004) and Tetlock (2007), textual analysis has played a crucial role in economics and finance. Sentiment is now more frequently extracted through textual information, of which information can provide a very useful context for understanding financial data and testing economic hypotheses. In fact, textual analysis of natural language texts is a large and growing field, especially for financial economists. Furthermore, textual analysis has a wide range of applications, from social media content to Central Bank's communication to the public. This Special Issue is focusing on the impact of the sentiment of public and media news, corporate announcements, and other forms of financial news articles on financial markets, commodities, and economic behavior in general. In this Special Issue, we would like to exploit new avenues of how sentiment analysis can be used to forecast stock markets, commodities and bond markets, or act as an early warning system for upcoming financial and economic realizations, and, finally, how they can enhance our understanding of financial and economic systems

About the Journal

Message from the Editor-in-Chief

I'm thrilled to take the leadership reins of the *International Journal of Financial Studies* and welcome the opportunity to make it one of the vanguard open-source scientific journals in our field. I eagerly look forward to working with the journal editorial team in building upon the quality instilled by my predecessor to develop the title further and broaden the appeal to other new finance research areas while keeping our core a high-quality finance journal that serves and highly values the scientific community, readers and authors alike. *IJFS* aims to publish high-quality manuscripts in both theoretical and empirical finance spanning all the major research areas in the field. It aims to provide an outlet for original finance scholarly research that promotes interaction among finance scholars and practitioners and bridges the divide that can exist between them.

Editor-in-Chief

Prof. Dr. Zied Ftiti
