of Basilicata, 85100 Potenza, Italy

Deadline for manuscript
submissions:

closed (16 July 2018)

Message from the Guest Editors

In recent years, there has been an increasing number of research projects focused on natural hazards (NHs) and climate change impacts, providing a variety of information to end users or to scientists working on related topics. The special issue aims at promoting new and innovative studies, experiences, and models to improve risk management and communication about natural hazards to different end users. End users such as decision and policy makers or the general public need information to be easily and quickly interpretable, properly contextualized, and therefore specifically tailored to their needs. On the other hand, scientists coming from different disciplines related to natural hazards and climate change need more complete datasets to be integrated in their analysis.

This special issue encourages critical reflection on natural risk mitigation and communication practices, and provides an opportunity for geoscience communicators to share the best methods and tools in this field.

an Open Access Journal by MDPI

Cartography and Geographic
Information Science, Department
of Geography and Regional
Research, University of Vienna,
Universitätsstr. 7, A-1010 Vienna,
Austria

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Remote Sensing*) / CiteScore - Q1 (Geography, Planning and Development)
