

an Open Access Journal by MDPI

Spatial Data Science

Guest Editors:

Dr. Fernando Bação

NOVA Information Management
School (NOVA IMS), Universidade
Nova de Lisboa, Campus de
Campolide, 1070-312 Lisboa,
Portugal

Dr. Martin Behnisch

Leibniz Institute of Ecological
Urban and Regional
Development, Dresden, Saxony,
Germany

Dr. Maribel Yasmina Santos

University of Minho, Department
of Information Systems, Campus
de Azurém, 4800-058 Guimarães,
Portugal

Deadline for manuscript
submissions:

closed (31 March 2020)

Message from the Guest Editors

Data is our best prospect to significantly improve our understanding of the world, ease the attrition in human/environment interaction, optimize resource allocation and mitigate human suffering and deprivation. Nevertheless, data, especially big data, pose difficult research challenges that need to be met and overcome, in order to bring these promises to fruition. To address these challenges is the mission of Data Science. Different types of data require specific tools methods and different analysis contexts require different analytic approaches. Spatial data science is concerned with research and problems where location is a central component of the problem. Spatial data science expertise is central in many practical problems, such as environmental management, public health, crime, remote sensing, just to mention a few. Significant progress has been made in the last few years, often driven by the industry. Academia needs to support this progress, contributing with general solutions and fundamental principles that can be of use in different contexts.

- Spatial data science
- Big Data
- Geoinformation
- GIScience
- Geographic Data Mining
- Geocomputation
- Smart Cities
- Remote Sensing

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Wolfgang Kainz

Cartography and Geographic
Information Science, Department
of Geography and Regional
Research, University of Vienna,
Universitätsstr. 7, A-1010 Vienna,
Austria

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [GeoRef](#), [PubAg](#), [dblp](#), [Astrophysics Data System](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q2 (Remote Sensing) / CiteScore - Q1 (Geography, Planning and Development)
