Message from the Guest Editors

Dear Colleagues,

Economic data analysis is a very important part in a decision-making process. Today, the importance of the geospatial component inherent in most economic data is rapidly increasing. Therefore, the added value of introducing geospatial aspects to economic data analyses is highly appreciated. Many economists are implementing the spatial aspect more and more in their research, which creates strong ties between economy and GIScience (and related disciplines); and vice versa.

This Special Issue strives to establish a scientific platform for sharing results of an empirical research in the field of “spatial economy”. We invite all contributions that focus on spatial exploration and explanation of (socio)economic data of a contemporary world. Paper submission may be focused regionally as well as at different geographical scales, preferably using quantitative data-driven or methods-driven approaches. Possible application areas include (but are not limited to):

Deadline for manuscript

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [GeoRef](#), [AGRICOLA](#), [dblp](#), [Astrophysics Data System](#), [Inspec](#), and many other databases.

Journal Rank: [JCR - Q2 \(Geography, Physical\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
