Message from the Guest Editors

Dear Colleagues,

Earth systems science is fundamentally cross-disciplinary. This, increasingly, requires sharing and exchange of geoscientific information among researchers with different backgrounds and traditions crossing discipline boundaries. This information can be both rich and complex, and content is often not readily interpretable by either humans or machines. In the former case the lack of common semantics, tacit knowledge, and different paradigms harm collaborative research blocking communication and preventing convergence of practices, exchange formats, and access mechanisms. The key to addressing such issues is possibly the representation of knowledge, acting as a map: guiding actors and driving collaboration. Several approaches, methods, and tools can be employed that rely either on the strict denotative formalization of knowledge or loose connotative pragmatics.

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [GeoRef](#), [PubAg](#), [dblp](#), [Astrophysics Data System](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q2 (Remote Sensing) / CiteScore - Q1 (Geography, Planning and Development)
