Message from the Guest Editors

Dear Colleagues,

Cartography and Geomedia is a view of cartography as a combination of technology, science and art with a focus on the development of geomedia in the geomatic and artistic dimensions.

If geography describes geographic space, and cartography illustrates this space, one can indicate the media that both disciplines use to transfer knowledge: text, photography, graphics, animation, video, sound, music, virtual environment, computer games, and others. Geomedia are therefore means of transmitting information about geographical space that the creator uses separately or jointly.

In this Special Issue, we will focus on the use of individual media as information carriers in the context of the role of a map or cartographic shape as the core of a geomedia product.

We will be honoured by your participation in our deliberations.

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [GeoRef](#), [PubAg](#), [dblp](#), [Astrophysics Data System](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q2 (Remote Sensing) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
