submissions:

closed (31 December 2012)

Message from the Guest Editor

Dear Colleagues,

Geospatial modelling came out with a throughput of analysis approaches to monitor environmental change over time considering different fields of research, including computer science, remote sensing, ecology, environmental science, life science, geography. The aim of this special issue is to publish straightforward research or review papers on the matter in order to stimulate further discussion on the potential of geospatial modelling. It is my pleasure to encourage both theoretical and empirical papers on the matter with the support of the International Society for Photogrammetry and Remote Sensing, promoting an advanced forum for the science and technology of geographic information.

Dr. Duccio Rocchini

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [GeoRef](#), [PubAg](#), [dblp](#), [Astrophysics Data System](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q2 (Remote Sensing) / CiteScore - Q1 (Geography, Planning and Development)
