Deadline for manuscript
submissions:

closed (20 December 2020)

Message from the Guest Editors

Agent-Based Modelling is a method that is ideally suited to modelling many social and spatial phenomena, particularly in human-environmental systems where the interactions and behaviours of heterogeneous individuals are key to understanding the wider system-level behaviour.

This Special Issue aims to capture state-of-the-art findings in agent-based modelling of spatial systems, with a particular emphasis on papers that are advancing the discipline through new approaches to validation, the use of new data, or policy-focussed work that can evidence a strong collaboration with end users. We encourage papers ranging from those that address fundamental methodological issues in toy systems to fully-fledged empirical applications. Submissions are particularly encouraged from early-career researchers, following the [European Research Council definition](#) of **within 7 years since the completion of their PhD** (plus additional allowances for career breaks etc.). Research supervisors and senior colleagues are allowed as co-authors, but the lead author must be an early career researcher.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [GeoRef](#), [PubAg](#), [dblp](#), [Astrophysics Data System](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q2 (Geography, Physical) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
