

## Special Issue

# Geo-Information Technology and Its Applications

### Message from the Guest Editors

Geo-information technology has been playing a more and more important role in environmental monitoring, land resource quantification and mapping, natural hazard damage and risk assessment, urban planning, smart city development and other land use change monitoring and modeling. New advancements and innovations have been achieved especially with the emergence of big data mining and machine learning including deep learning technique. It is hence the objective of the International Conference on Geo-Information Technology and its Applications (ICGITA 2019) to provide a platform for worldwide experts in these fields to exchange and communicate their outcomes and experiences with each other and to promote the advancement of geo-information technology and its applications.

## About the Journal

### Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Geography, Physical) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
