Volunteered Geographic Information: Emerging Applications in Public Science and Citizen Participation

Message from the Guest Editors

Increased participation by citizens and communities in environmental application and planning processes has generated various research in the area of citizen-centric land and environmentally-related planning, design, and management. The availability of geographic data collection opportunities and the dissemination of online large repositories have the potential to complement, update or even replace data obtained from traditional sources, effectively necessitates new scientific data handling for mining, interpreting and analyzing, and for integrating citizens' opinions into the various processes. The primary objective of this Special Issue is to promote a deeper understanding of land and environmentally-related perspectives of user-generated geographic data, addressing topics such as land administration and management (cadastre), urban and environmental planning, sustainable development, data integration, standardization and quality, analysis processes, and OpenStreetMap. Assist. Prof. Dr. Sagi Daylot

About the Journal

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Editor-in-Chief

Prof. Dr. Wolfgang Kainz
Cartography and Geographic Information Science, Department of
Geography and Regional Research, University of Vienna,
Universitätsstr. 7, A-1010 Vienna, Austria

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Geography, Physical) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
