

## Special Issue

# Spatial Data Infrastructure for Distributed Management and Processing

### Message from the Guest Editors

A set of organizations interested in maintaining and processing a certain portion of spatial data can build a virtual organization. The coordination of these new entities is possible thanks to the development of a common spatial data infrastructure (SDI) that is becoming a reality in many countries. A spatial data infrastructure is a technological infrastructure through which several organizations with overlapping goals can share data, resources, tools, and competencies in an effective way. Large SDIs require new, effective techniques to continuously integrate spatial data coming from different sources and characterized by different quality levels. This Special Issue aims at promoting new and innovative studies, proposing new architectures or innovative evolutions of existing ones, and illustrating experiments on current technologies in order to support the construction and maintenance of an integrated spatial data infrastructures.

## About the Journal

### Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

### Editor-in-Chief

Prof. Dr. Wolfgang Kainz  
Cartography and Geographic Information Science, Department of  
Geography and Regional Research, University of Vienna,  
Universitätsstr. 7, A-1010 Vienna, Austria

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Geography, Physical) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
