

# Special Issue

## Geospatial Metadata

### Message from the Guest Editors

Spatial metadata are a critical part of spatial data infrastructure by which custodians and users of spatial data organise and access the data. While spatial metadata have served the needs of custodians well in terms of data organisation, it is always argued that users do not find the records useful due to several reasons, such as the content, organisation of records, user-friendliness, and fitness for purpose. This Special Issue invites researchers and practitioners to submit original work on user-focused spatial metadata systems. We accept a wide range of contributions, such as metadata data issues relevant to user requirement analysis, user metadata interaction, metadata standards, data and metadata modeling, data catalogues, metadata for 3D and 4D spatial data, spatial metadata 2.0, 3.0, and 4.0. We welcome submissions from diverse disciplines, including urban planning, public safety, geographic information science, Human-Computer Interaction, Internet of Things, Big Data, and others.

## About the Journal

### Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

---

### Editor-in-Chief

Prof. Dr. Wolfgang Kainz  
Cartography and Geographic Information Science, Department of  
Geography and Regional Research, University of Vienna,  
Universitätsstr. 7, A-1010 Vienna, Austria

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Geography, Physical) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
