

Special Issue

Geospatial Monitoring with Hyperspatial Point Clouds

Message from the Guest Editors

This Special Issue promotes new and innovative field procedures, data acquisition techniques, data processing and analysis algorithms to support monitoring, combined sensor or geospatial data integration, and uncertainty modelling for improved monitoring with point clouds. We invite submissions of either original technical papers or high-quality review papers that shed new light on a particular perspective of geospatial monitoring with point clouds. Contributions that develop techniques relevant to monitoring (e.g., point cloud classification) are welcome, but should provide a clear application to monitoring rather than presenting a generic approach. Likewise, monitoring applications that do not utilize a point cloud in some form will not be considered for the Special Issue. We encourage you to participate in this important Special Issue and hope to see your contribution! Assoc. Prof. Michael James Olsen

Guest Editors

Dr. Michael James Olsen

Dr. Michael Starek

Dr. Craig Glennie

Deadline for manuscript submissions

closed (31 October 2019)

About the Journal

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Editor-in-Chief

Prof. Dr. Wolfgang Kainz
Cartography and Geographic Information Science, Department of
Geography and Regional Research, University of Vienna,
Universitätsstr. 7, A-1010 Vienna, Austria

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Remote Sensing) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
