

Special Issue

Open Science in the Geospatial Domain

Message from the Guest Editor

Open Science is being adopted by several research foundations and agencies worldwide as a core strategy to foster knowledge diffusion. This represents a new approach to research and educational processes based on OPEN data, sources, methodologies, reviews, access, and educational resources. While benefits are widely recognized, it is not always simple to apply this approach in practice: available resources, set strategies and existing common practices may be obstacles. This Special Issue aims to show the state-of-the-art in the geospatial domain with respect to the application of Open Science. Contributions on experiences that implement the Open Science approach, or any of the specific Open Science pillars (data, code, paper, review, standards ?), in the geospatial domain, and that discuss principles, barriers and solutions are important to identify future challenges and best practices. This will help scientists harnessing the full potential of this new paradigm and put in practice Open Science, contributing to the future benefit of humanity.

About the Journal

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Editor-in-Chief

Prof. Dr. Wolfgang Kainz
Cartography and Geographic Information Science, Department of
Geography and Regional Research, University of Vienna,
Universitätsstr. 7, A-1010 Vienna, Austria

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Geography, Physical) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
