Public Participation in 2021: New Forms, New Modes, New Questions?

Message from the Guest Editors

Public participation is attracting new interest and concerns, especially in the context of smart city discussions around the world and associated information technology developments, through considerations of professional and academic work. Increased interactivity with web-based GI-Toolsets, new and richer datasets from sensors and mobile devices, the wide availability of LiDAR data, and increased capacities of SDI-based infrastructures allow us to reimagine what public participation can be and what it can achieve. The smart city vision opens up new vistas for thinking about how and what citizens and governments can realize through public participation. It also leads to critical reflections on past experiences regarding what is possible through public participation and how to improve current research. We are particularly interested in contributions engaging with projects and issues in the Global South for this Special Issue, with additional support for those contributions.

About the Journal

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Editor-in-Chief

Prof. Dr. Wolfgang Kainz
Cartography and Geographic Information Science, Department of
Geography and Regional Research, University of Vienna,
Universitätsstr. 7, A-1010 Vienna, Austria

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Geography, Physical) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
