

Special Issue

Advances in Geospatial Technologies in Monitoring Blue Carbon Ecosystems Using Multiple Source Remote Sensing and GIS Data

Message from the Guest Editors

This Special Issue encourages authors to share recent advances in geospatial technologies for monitoring BC ecosystems, such as their structures, species, biomass retrievals, and carbon stock estimation, using multisource remote sensing and GIS data combined with advanced techniques in geospatial technology, UAV photogrammetry, advanced artificial intelligence (AI) techniques (i.e., deep learning, machine learning, hybrid and ensemble techniques, transfer learning, tensor learning for classification and regression tasks, and high-performance computing) to extract knowledge from multisource earth observation data.

Guest Editors

Dr. Tien Dat Pham
Prof. Dr. Kunihiro Yoshino
Dr. Yudi Setiawan

About the Journal

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Editor-in-Chief

Prof. Dr. Wolfgang Kainz

Cartography and Geographic Information Science, Department of
Geography and Regional Research, University of Vienna,
Universitätsstr. 7, A-1010 Vienna, Austria

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Geography, Physical) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
