Special Issue

Natural Hazards and Geospatial Information

Message from the Guest Editor

The scale, intensity and prevalence of emergencies and disasters are increasing around the world. Advances in geospatial information can help scientists, citizens, government leaders and industry to understand what is needed, and how to find it, in the event of a crisis. Geomatics engineering and geospatial services can help to save lives, protect the environment and protect key resources and critical infrastructure systems. Geospatial information is critical for all phases of the disaster management cycle, from developing preparedness solutions to supporting command and control. After a disaster, GIS, remote sensing and GPS systems can help to prioritize response and recovery efforts Prof. Jason K. Levy

About the Journal

Message from the Editor-in-Chief

The ISPRS International Journal of Geo-Information invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider IJGI for your scientific papers and would be pleased to welcome you as authors.

Editor-in-Chief

Prof. Dr. Wolfgang Kainz

Cartography and Geographic Information Science, Department of Geography and Regional Research, University of Vienna, Universitätsstr. 7, A-1010 Vienna, Austria

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Geography, Physical) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
