

## Special Issue

# Geo-Information Applications in Active Mobility and Health in Cities

### Message from the Guest Editors

There is growing evidence that active mobility can have a range of positive outcomes for the wider community. Active mobility, or non-motorised modes of transport, refers to any kind of transport that gives people mobility with methods other than motor vehicles. The most common modes of active transport are walking and cycling. The increased amount of walking and cycling in cities benefits health through increased physical activity. 2020 has become a disruptive year due to COVID-19 pandemic, during these challenging times, active mobility has become of importance as never before. In recent years, the proliferation of data, visualizations, dashboards and interactive mapping and GIS technologies has opened new opportunities for data modelling, data-driven approaches, and analytics especially in the field of active mobility. While significant developments have been achieved in the field of modelling active mobility in cities, the recent COVID19 crisis amplified the increasing need for more research in this area.

### Guest Editors

Dr. Ori Gudes

1. School of Population Health, Faculty of Medicine, University of New South Wales, Kensington Campus, Sydney, NSW 2052, Australia  
2. Australian Urban Observatory (AUO), Centre for Urban Research, RMIT University, Melbourne, VIC 3000, Australia

Dr. Simone Zarpelon Leao

City Analytics, City Futures Research Centre, University of New South Wales, Kensington Campus, Sydney, NSW 2052, Australia

### Deadline for manuscript submissions

closed (30 November 2021)

## About the Journal

### Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

---

### Editor-in-Chief

Prof. Dr. Wolfgang Kainz  
Cartography and Geographic Information Science, Department of  
Geography and Regional Research, University of Vienna,  
Universitätsstr. 7, A-1010 Vienna, Austria

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Geography, Physical) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
