

Special Issue

Geomorphometry and Terrain Analysis

Message from the Guest Editors

Terrain is considered one of the most important natural geographical features and a key factor in physical processes. Geomorphometry, as the science of digital terrain sensing, quantification, and analysis, provides important toolsets for geomorphology, hydrology, soil science, as well as general geographical information science. With the progress of elevation data acquisition techniques and terrain analysis methods, surface morphology and its corresponding processes are investigated and interpreted across different scales and aspects, which significantly contribute to a deeper understanding of Earth surface processes. This Special Issue focuses on the ideas of transforming current geomorphometry research from the study of surface morphology to the study of dynamic landform processes.

Guest Editors

Prof. Josef Strobl

Department of Geoinformatics, University of Salzburg, Salzburg, Austria

Prof. Liyang Xiong

School of Geography, Nanjing Normal University, Wenyuan Road 1#,
Nanjing 210023, Jiangsu Province, China

Deadline for manuscript submissions

closed (31 December 2021)

About the Journal

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Editor-in-Chief

Prof. Dr. Wolfgang Kainz
Cartography and Geographic Information Science, Department of
Geography and Regional Research, University of Vienna,
Universitätsstr. 7, A-1010 Vienna, Austria

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Geography, Physical) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
