

Special Issue

Geospatial Data and Services for Wildlife Management and Conservation

Message from the Guest Editors

There has been a rapid development of methods to remotely collect large amounts of geospatial data on landscape characteristics, natural resources, and even animal locations and movement across various spatial and temporal scales. Combining these new datasets together creates a unique opportunity for efficient, data-driven wildlife management and conservation from local to global extents. However, acquiring and managing this vast amount of information comes with challenges. Geospatial services, which often utilize GIS (geographic information systems), GPS (global positioning system), and/or remote sensing observations, provide the integrative technology to create, analyze, maintain, and distribute geospatial data and information. In this Special Issue, we call for papers exploring the vast subject of acquiring, managing and analyzing geospatial data for improved wildlife management and conservation.

About the Journal

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Editor-in-Chief

Prof. Dr. Wolfgang Kainz

Cartography and Geographic Information Science, Department of
Geography and Regional Research, University of Vienna,
Universitätsstr. 7, A-1010 Vienna, Austria

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Geography, Physical) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
