

## Special Issue

# Historical GIS and Digital Humanities

### Message from the Guest Editors

Since the middle of the 2000s, digital humanities (DH) research projects involving the collaboration and uniting of researchers from both the humanities and sciences fields have begun developing even within the conventional humanities world to build archives of academic materials using information and communication technology (ICT), analyzing cultural contents, publishing research results, focusing on how the results are to be shown, and so forth. Of these, the historical geographical information systems (GIS) using geospatial information have served as a spatial turn in the humanities and become central to the creation of new academic fields within humanities, such as GeoHumanities and Spatial Humanities. These ensure a significant development in new, project-based research styles through interdisciplinary and international collaborations using historical GIS. This Special Issue aims to promote new and innovative studies and to propose new possibilities of interdisciplinary and collaborative research within the humanities in order to improve historical GIS and the digital humanities with a spatial turn.

## About the Journal

### Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Geography, Physical) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
