## **Special Issue**

## Geospatial Methods in Social and Behavioral Sciences

### Message from the Guest Editor

Geospatial methods have been used in social and behavioral science research to examine a wide range of issues (e.g., residential segregation, commuting behavior, active transportation, accessibility to urban facilities, spatial mismatch between jobs and housing. spatial patterns of crime, activity-travel behavior, spatial inequality in health behaviors and outcomes, political redistricting, substance use behavior, natural disasters, and so on). However, recent advances in and widespread use of geospatial technologies for collecting and analyzing high-resolution space-time data (e.g., real-time sensing, GPS tracking, and LiDAR) provide many opportunities to bring forth new insights to these issues. Further, recent studies have also used geospatial methods (e.g., GeoAl and geovisualization) that go beyond the conventional spatial framework of fixed areal units (e.g., census tracts) and the static temporal framework to examine many issues in social and behavioral science research.

### **Guest Editor**

Prof. Dr. Mei-Po Kwan

Institute of Space and Earth Information Science & Department of Geography and Resource Management, The Chinese University of Hong Kong, New Territories, Sha Tin, Hong Kong

### Deadline for manuscript submissions

### **About the Journal**

### Message from the Editor-in-Chief

The ISPRS International Journal of Geo-Information invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider IJGI for your scientific papers and would be pleased to welcome you as authors.

### Editor-in-Chief

### Prof. Dr. Wolfgang Kainz

Cartography and Geographic Information Science, Department of Geography and Regional Research, University of Vienna, Universitätsstr. 7, A-1010 Vienna, Austria

### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

### Journal Rank:
