

Special Issue

Storytelling with Geographic Data

Message from the Guest Editors

Dynamic, interactive web maps that tell stories have become pervasive in all aspects of the mobile information society. What are the design guidelines and best practices of online geovisual storytelling? How efficiently and effectively do uncovered data stories communicate statistical relationships to a broad and diverse set of non-expert users? We invite you to contribute to this Special Issue of the ISPRS International Journal of Geo-Information to explore the frontier in geographic data driven story telling on the Web 2.0. We encourage submissions from all relevant disciplines and from a diverse set of scientific practices aimed to further advance this transdisciplinary research field. We are especially looking for empirical contributions that evaluate new forms of online communication of geographic information for a broad range of issues, users, and respective user engagements.

Guest Editors

Prof. Sara Irina Fabrikant

About the Journal

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Editor-in-Chief

Prof. Dr. Wolfgang Kainz
Cartography and Geographic Information Science, Department of
Geography and Regional Research, University of Vienna,
Universitätsstr. 7, A-1010 Vienna, Austria

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Geography, Physical) / CiteScore - Q1 (Earth and Planetary Sciences (miscellaneous))
