Deadline for manuscript
submissions:

30 July 2024

Message from the Guest Editor

Microorganisms possess an enormous potential to transform substrates. Nutrient-rich foods are a perfect substrate to sustain microbial growth and be transformed into different ones. Additionally, the inclusion of microorganisms in food is usually well-accepted by consumers, since they are within the clean label tendency.

Thus, the use of these microorganisms could contribute to the development of new foods, increase their safety and enhance their physicochemical and sensory properties, as well as their nutritional composition. Finally, the ability of microorganisms to positively impact human health, such as the pre-, pro- and postbiotic activities, deserves to be studied.

Therefore, this Special Issue will focus on the research of the molecular mechanisms and application of microbial biotechnology in food.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
