Prof. Dr. Oleksii Skorokhod

Department of Life Sciences and Systems Biology, University of Torino, 10123 Torino, Italy

Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editors

The mechanisms of pathogenesis are still not fully understood for many diseases. Protein modifications are involved in various disorders wherein the protein structure and function are affected. These modifications could be very important as the cause or consequence (or both) of pathological processes, especially if the targeted proteins are of pivotal importance.

Important protein modifications such as phosphorylation, ubiquitination, methylation and acylation are relatively well-studied. Nevertheless, these and other types of modifications, including oxidation, alkylation and others, which could be involved in tune bioregulation, are of high interest and are currently under extensive study.

The discovery of new modifications or new features of known posttranslational protein modifications could advance our understanding of diseases and lead to the proposal of new therapeutic strategies.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
