submissions:
closed (31 May 2023)

Message from the Guest Editors

Dear Colleagues,

While even nonfunctionalized polymers are widely used, polymers bearing functional groups and moieties are the most popular of the compounds produced by the industry. Functionality defines peculiar properties that make the corresponding polymers interesting, for example, for medicine or the energy industry. There is an urgent need to develop an effective methodology for the synthesis of structurally new polymer architectures in order to uncover novel valuable properties that surpass those previously achieved. New discoveries are possible in the future, and some have perhaps already been found. This Special Issue intends to be a space for such interesting discoveries.

We invite you to submit a manuscript—full paper, communication, or review—reporting new results of functional monomers and polymer design, demonstration of their properties, and identification of structure–property relationships. The more novel structures and properties are demonstrated, the wider and deeper the knowledge about polymers will be.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
