submissions:

**closed (25 March 2024)**

### Message from the Guest Editor

Dear Colleagues,

Peptide drugs have attracted increased attention over the last few years and have now reached the market for the treatment of a wide range of diseases, such as diabetes, cancer, and inflammatory diseases. This Special Issue will focus on the newest developments in the field of peptide-based therapeutics. This includes the discovery of novel peptide inhibitors from nature and other sources and their characterization and optimization for therapeutic applications. Manuscripts covering novel methods for peptide chemistry and modifications, rational drug design, as well as drug delivery systems are welcome. In addition, we will focus on new pharmaceutical targets and major breakthroughs in peptide biology.

Dr. Mirja Harms

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
