Message from the Guest Editor

Dear Colleagues,

Chronic liver diseases, spanning a spectrum from metabolic disorders to viral hepatitis, have become a significant global health challenge, impacting millions of individuals worldwide. Hepatocellular carcinoma (HCC), a major consequence of chronic liver diseases, stands as a leading cause of cancer-related morbidity and mortality. The rising prevalence of these conditions underscores the critical need for publishing advanced insights to inform diagnostic, prognostic, and therapeutic strategies.

This Special Issue, supervised by Dr. Marios Papadakis and assisted by our Topical Advisory Panel Member Dr. Stavros P. Papadakos (National and Kapodistrian University of Athens, Greece), aims to significantly contribute to our understanding of liver-related health challenges. By fostering research on these key themes, this Special Issue aspires to enhance global efforts in the diagnosis, treatment, and prevention of chronic liver diseases and HCC.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. José L. Quiles

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
