Biotechnology and School of
Chemical Engineering and
Analytical Science, The University
of Manchester, 131 Princess
Street, Manchester M1 7DN, UK

Deadline for manuscript
submissions:

closed (20 March 2024)

Message from the Guest Editor

Enzymes are efficient molecular catalysts in nature that work under ambient pressures and temperatures and catalyse a large variety of chemical reactions by using environmentally benign systems. There is much to learn from nature on how to convert chemicals into useful products. In particular, enzymes react very fast and often, these fleeting intermediates are difficult to trap and characterize. Over the past few years, major breakthroughs in understanding enzymatic catalysis have been obtained and highlights of novel research problems and solutions are the topic of this Special Issue. This Special Issue will welcome review, opinion, and research articles that focus on, but are not limited to, the above topics.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
