338 Lodz, Poland
2. Ciccarone Center for the
Prevention of Cardiovascular
Disease, Division of Cardiology,
Department of Medicine, Johns
Hopkins University School of
Medicine, Baltimore, MD, USA

Deadline for manuscript
submissions:

29 August 2024

Message from the Guest Editor

Dear Colleagues,

There has recently been high interest in all kinds of biomarkers and interventions that might help to evaluate expected lengths of lives and make it possible to extend lifetimes. On the one hand, our knowledge on the prediction of life expectancy seems to be increasingly accurate with the possibility of evaluating concrete biomarkers like telomere length, mitochondria activity and functions, changes in microvascular circulation, microbiome, advanced glycation end products, glycans, and whole-genome analysis. On the other hand, many inconsistencies remain in how to interpret these parameters correctly and, in particular, how they will be affected by concrete and dedicated interventions.

Lifestyle factors such as a healthy diet and physical activity play a crucial role in healthy aging. Lifestyle changes can have major effects on molecular biomarkers, mitochondrial activity, or white blood cell telomere length (LTL). This Special Issue will cover all molecular aspects of promoting longevity, aiming to provide further knowledge on new molecular targets, biomarkers, lifestyle improvement, and other interventions that might help to predict and improve the lifespan.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
