Message from the Guest Editor

Dear Colleagues,

In regenerative medicine, mesenchymal stem cells are known to alleviate inflammatory responses by regulating the activity of various inflammatory cells. It is reported that mesenchymal stem cells regulate inflammatory responses by expressing IDO, PGE2, HGF, TSG-6, etc., but their expression is significantly induced when mesenchymal stem cells are exposed to inflammatory cells or an inflammatory microenvironment. Therefore, understanding the mutual communication between mesenchymal stem cells and immune cells or between mesenchymal stem cells and cytokines is very helpful in understanding the mechanism of action of mesenchymal stem cells in regenerative medicine.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
