Deadline for manuscript  
submissions:

**20 August 2024**

### Message from the Guest Editors

Dear Colleagues,

Hybrid organic–inorganic materials with desirable properties have become a fascinating field of research in materials science. These refer to architectures consisting of both inorganic and organic components that contribute to their structural versatility and remarkable properties. Such materials can be classified into two large groups: Class I hybrids built by weak interactions between the components, and Class II hybrid materials assembled by strong interactions between the components. Thus, they represent potential modular platforms for applications in diverse fields such as optics, micro-electronics, sensing, energy storage, drug delivery, catalysis, and pollutant remediation.

This Special Issue provides a way to present the achievements of the design of hybrids with different functionalities and their tailored properties. Furthermore, it also covers the synthesis and structural features that permit the discovery of new materials, their applications, and the theoretical studies of the structure–property relationships. Contributions to this Special Issue, in the form of original research or review articles, are welcome.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
