Deadline for manuscript
submissions:

31 May 2024

Message from the Guest Editor

This Special Issue honors the discoverer of macrophages, Elie Metchnikoff, who observed these phagocytic cells in the process of innate immunity in 1882. Macrophages serve important functions in immune response, development, tissue homeostasis e.g. wound healing and tissue repair. The important functions of the macrophages can be disturbed in chronic diseases and autoimmune diseases, which includes atherosclerosis, asthma, fibrosis, inflammatory bowel disease, rheumatoid arthritis (RA), experimental autoimmune encephalomyelitis (EAE), multiple sclerosis (MS), autoimmune hepatitis, Crohn's disease and chronic demyelinating diseases of the central nervous system. The pathogenesis of these diseases is based on changes in the differentiation, polarization, re-polarization and activation of macrophages. In order to gain a better understanding of how novel therapies can be developed, the diversity of macrophage functions needs to be better understood.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
