USA

Deadline for manuscript
submissions:

closed (20 May 2025)

Message from the Guest Editor

Dear Colleagues,

We are launching this Special Issue on brain metastasis, called “Brain Metastasis 2024”, which focuses on the stage of cancer resulting from a multi-level cell colonization of the brain and cancer cell spreading in the brain microenvironment. Brain metastasis is a devastating occurrence in many cancer types, notably in lung, melanoma, and breast cancer. Newly developed approaches stemming from using immunotherapy have been recently applied to patients with symptomatic brain metastasis; however, the effectiveness of an immune checkpoint blockade is limited. Improved understandings of the biology of brain metastasis and mechanistic underpinnings underlying brain metastasis development and progression are therefore urgently needed since they remain largely unknown. This Special Issue aims to provide new scientific and clinical outlooks on this important topic.

This Special Issue will assess, report, and discuss new discoveries in the biology, pathology, translational research, prevention, and treatment of brain metastasis. We welcome contributions in these and closely related areas to be submitted to “Brain Metastasis 2024”.

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology,
Institute of Nutrition and Food
Technology “Jose Mataix”,
Biomedical Research Center,
University of Granada, Avda.
Conocimiento s/n, 18100 Armilla,
Granada, Spain

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
