Message from the Guest Editors

This Special Issue on “AMP-Activated Protein Kinase (AMPK) Signalling 2.0” as its ancestor will cover recent advances in this expanding field, ranging from molecular and cellular to in vivo approaches, including human disease relevance and drug research. Up-to-date reviews, research articles, and short communications will all be considered.

Despite our extensive current knowledge about AMPK, the growing community is busier than ever. Authors are invited to submit manuscripts in all areas of recent and current AMPK research with an emphasis on work providing molecular insights, including but not limited to novel physiological and pathological functions, or regulatory mechanisms.

We welcome your contributions for the second volume: Special Issue on AMP-activated protein kinase signalling 2.0.

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
