### Message from the Guest Editors

Dear Colleagues,

Prostate cancer (PC) is the second most diagnosed cancer in men. Nowadays, early detection of PC is mainly carried out testing prostate-specific antigen (PSA) level in blood. Regrettably, PSA cannot discriminate patients with benign prostatic hyperplasia (BPH) and clinically significant forms of PC. Metabolomics represents a valuable tool to discover new disease-associated markers. To date, two different metabolomics approaches have been commonly carried out, namely targeted and untargeted, on prostate tissue and bio-fluids. In prostatic cancer, metabolomics-based studies have shown many evidences that polar compounds possess a high potential of use as. Additional molecular biomarkers have been identified by the use of genomics and proteomics. The analysis of possible biomarkers not free but enclosed in extracellular nanovesicles such as exosomes released in the same bio-fluids seems to increase their specificity and accuracy. In particular the analysis in serum or urine of exosomal PSA seems to increase the specificity of this marker.

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
