Message from the Guest Editor

At the first diagnosis of bladder cancer patients, about 75% are diagnosed with non-muscular invasive bladder cancer (NMIBC) and the remaining 25% are diagnosed with muscle-invasive bladder cancer (MIBC) or metastatic bladder cancer. Although the 5-year survival rate of NMIBC patients was relatively good, at least 80%, the recurrence rate of NMIBC was reported from 31% to 78%, and the progression from NMIBC to MIBC ranged from 0.8% to 45%. Radiation and anticancer drugs are imposed on surgical operations to prevent this progression and recurrence, but there are many reports of cancer progression and recurrence due to cancer cells that resist these additional treatments. This Special Issue on “Bladder Cancer 2.0” has the objective of developing an updated investigation and rationale of biological behavior of bladder cancer focusing on molecular biology, cell biology, bioinformatics, biomarkers, diagnostics, and therapeutics.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
